

Sutter Health Snapshot: Novato Community Hospital

Across our not-for-profit network, in more than 100 Northern California communities, we are building a truly integrated system that could one day serve as a national model for quality and efficiency.

Recognized Nationally

Truven Analytics recognized us in 2016, as a top five large health system in the nation for saving more lives, having fewer complications and spending less per patient episode of care.

Serving Diverse Communities

We compassionately care for more than 3 million patients from some of the most ethnically and economically diverse communities in the world; speaking more than 100 different languages.

We Give Back

Not-for-profit Sutter Health invested \$612 million in 2017 to provide care for patients in need and to support community health programs. At Novato Community Hospital, we contributed \$9.4 million in 2017.

Caring For Underinsured

Our hospitals compassionately care for more low-income Medi-Cal patients in Northern California than anyone else – investing \$334 million in 2017.

Committed to Affordability

Our doctors and hospitals partner to reduce variation and adopt best practices. On average, total charges for an inpatient stay in a Sutter hospital are lower than what other Northern California hospitals charge.

Supporting Local Economies

As one of the largest employers in Northern California, we are more than 53,000 employees strong. We invested more than \$10 billion in the past decade to build and improve healthcare facilities and to launch cutting-edge technologies.

Part of the Sutter Health network of care, Novato Community Hospital provides 24-hour emergency care, inpatient and outpatient surgery, critical care, imaging services, laboratory services, and a physical therapy and sports fitness center.

In addition to general surgery, Novato Community Hospital specializes in orthopedic surgery and total joint replacement, including hands, hips, shoulders and knees. The 40-bed hospital houses three surgery suites, with one specifically designed for minimally invasive procedures.

Healthcare Quality

We earned the Joint Commission's Advanced Total Hip and Total Knee Replacement Certification, the highest distinction from the nationally recognized accrediting body.

Best of the Best

U.S. News and World Report named us as a High Performing Hospital in Knee Replacement in 2017.
