Van Ness Campus

CPMC's Van Ness Campus offers remarkable care, remarkably close. The new hospital offers advanced technology to support the highest-quality medical care.

General Medicine

The Van Ness Campus provides comprehensive general medical care for your patients. The hospital has 274 acute care beds, including 120 beds for surgery patients and 36 beds in the Intensive Care Unit. Each room is equipped with smart technologies to support optimal outcomes. All rooms also have windows with views to maximize natural light. We look forward to serving you and your patients.

Transplant Services

Our dedicated team has performed successful transplants for nearly 40 years, guiding patients and families through every step of the process, from preparation to recovery.

- Certified by both the UNOS Heart Transplant program and the Joint Commission Ventricular Assist Device program.
- Performed the first six-way kidney paired exchange among six donors and six recipients in California.
- More than 2,000 liver transplants since 1988.
- Better-than-expected patient outcomes for liver transplants (2018), according to the Scientific Registry of Transplant Recipients.

Complex Gastroenterology

Doctors and surgeons at the Van Ness Campus offer advanced imaging technology and minimally-invasive procedures for disorders of the esophagus, stomach, gallbladder, pancreas, small intestine and colon.

Hepatologists are available to consult on disorders affecting the liver. Neurogastroenterology and motility physicians work with patients who have complex gastroenterology needs or chronic abnormal muscular activity within their gastrointestinal tract.

Pediatric Emergency and Specialty Care

The **Emergency Department** is designed to serve the unique needs of children. We provide:

- Doctors board certified in both pediatrics and emergency medicine.
- Child-sized equipment.
- Private exam rooms large enough for family members.
- Child Life specialists to help children and parents with coping techniques and distractions.

Pediatric Specialty Care is provided by San Francisco pediatricians working side-by-side with physicians from Stanford Children's Health in more than 25 specialty areas. This gives parents access to world-leading research and some of the Bay Area's top doctors. For children who need to stay in the hospital, the Van Ness Campus offers a playroom for younger children and a recreation room for school-age children and teens.

Child Life Specialists work in every pediatric inpatient unit, and are available for children having outpatient surgery, radiology tests or treatments, and care in the specialty center or emergency room.

Maternity Care

The CPMC Women and Children's Center has moved to the new Van Ness Campus, where we'll continue to offer our renowned family-centered labor and delivery care. Our team helps deliver more than 5,000 babies a year, about 14 newborns every day. Our birth center has received the Joint Commission Gold Seal of Approval (2016-present).

We offer parents:

- Natural childbirth coaching.
- External and internal fetal monitoring.
- Professional lactation consultants.
- The Newborn Connections program to provide perinatal classes and support groups after delivery.
- A Level III Neonatal Intensive Care Unit.

Cardiovascular Care

The Van Ness Campus is home to CPMC's outstanding Heart and Vascular Center, which has earned many national awards, including these current honors:

- High performer in heart bypass surgery by U.S. News & World Report.
- Platinum Performance Award for heart attack care.

Heart doctors at the center are experienced leaders in minimally invasive aortic valve surgery such as TAVR and TMVR.
