

Personal Belongings

By March 1, the day before the move, please have a family member take home all personal items, such as flowers, cards, magazines and gifts. Once the move is complete they may bring the items to your new room.

Essential items such as dentures, glasses, hearing aids, and clothes will be placed in a bag labeled with your name and new room number, and will be transported with you to the new hospital.

18-CPMC-0012512 Patient Move

Moving to Your New Hospital

On Saturday, March 2, we will welcome all patients at Sutter CPMC's Pacific Campus to our new CPMC Van Ness Campus.

Your safety and comfort are our top priorities. CPMC has planned for this move for 11 years. Here you will find important Move Day information, including what to expect and how to prepare. If you have questions or need additional information, please ask your nurse.

Move Date and Time

Saturday, March 2, beginning at 8 a.m. Each move will take approximately 30 minutes.

Your Safety & Care During the Move

We want you to be comfortable during the move. Your doctor will ensure you can safely move. Your nurse will help you prepare, direct the team moving you and make sure everyone understands your special needs. A team of trained professionals will be with you every step of the way.

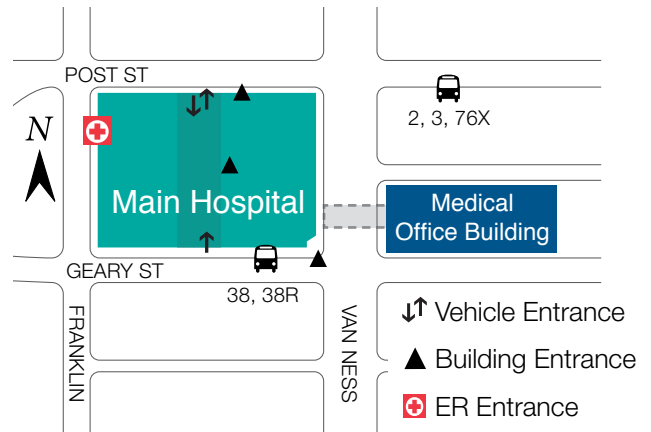

Move Transportation and Route

We have partnered with quality ambulance companies for a safe ride to the new hospital.

During the move, the main hospital entrance on Buchanan street will be closed. Please use the 2100 Webster entrance to the medical office building. Patients discharged on Move Day will exit from the Emergency Ambulance bay on the corner of Buchanan and Sacramento streets.

Parking and Hospital Access

Parking will be available at the Van Ness Campus (1101 Van Ness Ave.) Enter on Post street.

Family and Friends

On Move Day, family and friends are asked to wait in the Van Ness Campus, where a cozy family lounge has been set aside for their convenience. They will be notified once your move is complete and may then join you in your new hospital room. Family members arriving later in the day will check in at the information counter and be directed to your new room. Many staff and volunteers will be on-hand to help visitors find their way around the new hospital.

Cafeteria

As usual, our cafeterias will be closed on the weekend. Families waiting can enjoy refreshments provided in the family lounge.
