

Sutter Health Snapshot: Sutter Delta Medical Center

Across our not-for-profit network, in more than 100 Northern California communities, we are building a truly integrated system that could one day serve as a national model for quality and efficiency.

Recognized Nationally

Truven Analytics recognized us in 2016, as a top five large health system in the nation for saving more lives, having fewer complications and spending less per patient episode of care.

Serving Diverse Communities

We compassionately care for more than 3 million patients from some of the most ethnically and economically diverse communities in the world; speaking more than 100 different languages.

We Give Back

Not-for-profit Sutter Health invested \$612 million in 2017 to provide care for patients in need and to support community health programs. At Sutter Delta Medical Center, we contributed \$2.2 million in 2017.

Caring For Underinsured

Our hospitals compassionately care for more low-income Medi-Cal patients in Northern California than anyone else – investing \$334 million in 2017.

Committed to Affordability

Our doctors and hospitals partner to reduce variation and adopt best practices. On average, total charges for an inpatient stay in a Sutter hospital are lower than what other Northern California hospitals charge.

Supporting Local Economies

As one of the largest employers in Northern California, we are more than 53,000 employees strong. We invested more than \$10 billion in the past decade to build and improve healthcare facilities and to launch cutting-edge technologies.

Sutter Delta Medical Center is a 114-bed acute care hospital serving residents of Antioch, Brentwood, Byron, Discovery Bay, Knightsen, Oakley and Pittsburg. Sutter Delta's roots in East Contra Costa County date back 50 years.

Providing state-of-the-art healthcare for East Contra Costa County residents, Sutter Delta Medical Center offers an extensive array of inpatient and outpatient services, as well programs designed to address the needs of our community.

Healthcare Quality

We received the 2016 Hospital C-section Honor Roll from the California Health and Human Services Department for reducing cesarean births for first-time moms with low-risk pregnancies.

We were recognized as having the “Energy to Care” by the American Society for Healthcare Engineering, for trimming energy use by 17 percent since 2014.
