

Personal Belongings

By **August 24**, the day before the move, please have a family member take home all non-essential personal items, such as flowers, cards, magazines and gifts. Once the move is complete they may bring the items to your new room.

Important items such as dentures, glasses, hearing aids, and clothes will be placed in a bag labeled with your name and new room number, and will be transported with you to the new hospital.

Your Comfort

Because part of the move involves transporting  you a short distance outside, you will be provided with a special “Move Day” blanket for your warmth and comfort. This blanket is yours to keep as a memento of your participation in this historic day.

Moving to Your New Hospital

On Saturday, August 25, we will welcome all patients at Sutter CPMC's St. Luke's Campus to our new CPMC Mission Bernal Campus.

Your safety and comfort are our top priorities. CPMC has planned for this move for 11 years. Here you will find important Move Day information, including what to expect and how to prepare. If you have questions or need additional information, please ask your nurse.

Move Date and Time

Saturday, August 25, beginning at 8:00 a.m. We anticipate everyone will be moved by 4:00 p.m. Each move will take approximately 20 minutes.

Your Safety & Care During the Move

We want you to be comfortable during the move process. Your physician will ensure you can safely move. Your nurse will help you prepare, direct the team moving you and make sure everyone understands your special needs. A team of trained professionals will be with you every step of the way.

Individual Move Time

The day before the move, your nurse will be able to give you and your family an idea of what time you will be moved.

Move Transportation and Route

On Move Day, patients will transfer by stretcher across the short distance between the old and new buildings. The path of travel exits the St. Luke's Emergency Department, crosses an enclosed passageway and enters CPMC's new Mission Bernal Campus near the 27th Street Plaza. From there, patients will ride in a dedicated patient transport elevator to a new, private room.

Parking and hospital access

If you or your family normally park in the garage, on Move Day please take the complimentary shuttle to the front entrance, which will serve as the public access to the new Mission Bernal Campus on Move Day.

Family and Friends

On Move Day, family and friends are asked to wait in the new cafeteria at the Mission Bernal Campus. They will be notified once your move is complete and may then join you one in your new hospital room. Family members arriving later in the day will check in at the information counter and be directed to the patient's new room. Many staff and volunteers will be on-hand to help visitors find their way around the new hospital.

Cafeteria

As usual, there will be no food service available on the weekend.
