Across our not-for-profit network, in more than 100 Northern California communities, we are building a truly integrated system that could one day serve as a national model for quality and efficiency.

Recognized Nationally

Truven Analytics recognized us in 2016, as a top five large health system in the nation for saving more lives, having fewer complications and spending less per patient episode of care.

Serving Diverse Communities

We compassionately care for more than 3 million patients from some of the most ethnically and economically diverse communities in the world; speaking more than 100 different languages.

We Give Back

Not-for-profit Sutter Health invested $612 million in 2017 to provide care for patients in need and to support community health programs. At Eden Medical Center, we contributed $28 million in 2017.

Caring For Underinsured

Our hospitals compassionately care for more low-income Medi-Cal patients in Northern California than anyone else – investing $334 million in 2017.

Committed to Affordability

Our doctors and hospitals partner to reduce variation and adopt best practices. On average, total charges for an inpatient stay in a Sutter hospital are lower than what other Northern California hospitals charge.

Supporting Local Economies

As one of the largest employers in Northern California, we are more than 53,000 employees strong. We invested more than $10 billion in the past decade to build and improve healthcare facilities and to launch cutting-edge technologies.

Sutter Health's Eden Medical Center brings together patient-centered care, state-of-the-art technology and sophisticated design in a LEED-certified sustainable and seismically-safe building. The hospital has 130 beds, all in private rooms.

Eden is the regional trauma center for Southern Alameda County and features many centers of excellence, including neurosciences, orthopedics, rehabilitation, birthing center, imaging, stroke and cancer care.

Best of the Best

We were recognized in 2016 as a High Performing Hospital in Gastroenterology & GI Surgery, Nephrology, Orthopedics & Urology by U.S. News & World Report.

Healthcare Quality

The U.S. Department of Health and Human Services, Division of Transplantation, gave us a Partnership for Life Silver Award for promoting organ and tissue donation enrollment in 2016.
