Sutter Health

Snapshot: Sutter Lakeside Hospital

Across our not-for-profit network, in more than 100 Northern California communities, we are building a truly integrated system that could one day serve as a national model for quality and efficiency.

Recognized Nationally

Truven Analytics recognized us in 2016, as a top five large health system in the nation for saving more lives, having fewer complications and spending less per patient episode of care.

Serving Diverse Communities

We compassionately care for more than 3 million patients from some of the most ethnically and economically diverse communities in the world; speaking more than 100 different languages.

We Give Back

Not-for-profit Sutter Health invested $612 million in 2017 to provide care for patients in need and to support community health programs. At Sutter Lakeside Hospital, we contributed $11.1 million in 2017.

Caring For Underinsured

Our hospitals compassionately care for more low-income Medi-Cal patients in Northern California than anyone else – investing $334 million in 2017.

Committed to Affordability

Our doctors and hospitals partner to reduce variation and adopt best practices. On average, total charges for an inpatient stay in a Sutter hospital are lower than what other Northern California hospitals charge.

Supporting Local Economies

As one of the largest employers in Northern California, we are more than 53,000 employees strong. We invested more than $10 billion in the past decade to build and improve healthcare facilities and to launch cutting-edge technologies.

Sutter Lakeside Hospital is a 25-bed critical access hospital accredited by the Joint Commission.

As part of the Sutter Health network, Sutter Lakeside takes great pride in providing the highest quality of care possible, bringing a wealth of resources and advanced technologies to residents of Lake County and the surrounding communities.

Best of the Best

We were recognized in 2016 by the California Health and Human Services Department for reducing cesarean births for first-time moms with low-risk pregnancies.

In Our Community

In July 2017 we launched a countywide campaign called "Smart Start" to help families reduce their newborn's risk of Sudden Infant Death Syndrome (SIDS) and prevent suffocation deaths. The campaign connects new parents to available resources and has the support of Lake County Tribal Health and First 5 Lake County.

For more information call 707-262-5000.
